

## 2010 William A. Hiscock Memorial Scholarship Recipient

Congratulations to Courtney Peck, recipient of the 2010-2011 William A. Hiscock Memorial Scholarship. This award reflects the quality of the scientific creativity and merit of Courtney's proposed project "Determining the Relationship between Cosmic Rays and the Atmosphere."

Originally from Sidney, MT Courtney is a junior in physics at Montana State University. During a summer internship with BOREALIS she focused on cosmic ray monitoring using a Geiger counter and plans to further her cosmic ray research by creating a 24/7 ground based array which may include a Geiger counter, a neutron detector, and a gamma and x-ray monitor.
