

ASTRONOMY WORKSHOP

Montana Space Grant Consortium (MSGC) is hosting an all-expense paid, hands-on workshop to help introduce students to astronomy. This fall, the Montana Learning Center at Canyon Ferry will have students learning to use telescopes to take their own night-sky data and transform it into beautiful images.

Montana Undergraduates interested in STEM research are encouraged to apply. Those without previous experience or who are from small campuses are given priority.

Participants receive a \$200 stipend and certificate.
Travel is reimbursed and meals provided.

Dates:

10/14: 5:30pm

–

10/15: 3pm

To Participate:

1. Apply with the QR code or visit our webpage for more information:
<http://spacegrant.montana.edu/workshops.html>
2. Within two weeks complete a small project.
3. Consider participating in other MSGC opportunities.

Applications Due: September 30th, noon
